## Body Composition Analyzer

Well-Being | Well-Balanced | Wellness

## Multi-Frequency Analysis Technology

i30 provides accurate analysis of body composition through multi-frequency measurement. The measurement is made through bioelectrical impedance analysis (BIA), assessing the electrical resistance of cell membranes

## Segmental body composition analysis

Tetra-polar 8 point tactile electrodes system gives accurate measure of segmental body fat and muscle mass.

## Advanced body composition analysis algorithm with high accuracy

I30 uses the optimal algorithm developed by utilizing various body composition measurement methods such as DEXA, CT, and isotope dilution. It has a very high correlation coefficient with DEXA equipment, which is considered the Gold Standard in the body composition analysis method.

Also, the reliability of the algorithm has been proven through clinical trials conducted by specialized institutions for a wide range of ages from 5 years old to 78 years old. ( $R^2=0.984$ )

### Application Area

## Key Features

### Blind Mode

User can hide fat and weight information from the display by simply pressing a “Blind” button on the keypad. It can be turned on/off instantly during measurement and will be written at the result paper all the time

### Ergonomic Design for Comfortable Measuring Posture

The wide rotating radius of the handle and the hand electrode, which can be rotated to suit user’s posture, helps to test comfortably and accurately.

### Easy operation via touch screen

Convenient operation via keypad and touch screen control

### Simple Interface

Built-in display gives the analysis of the body composition more clearly and thoroughly

### Convenient Patient Data Management

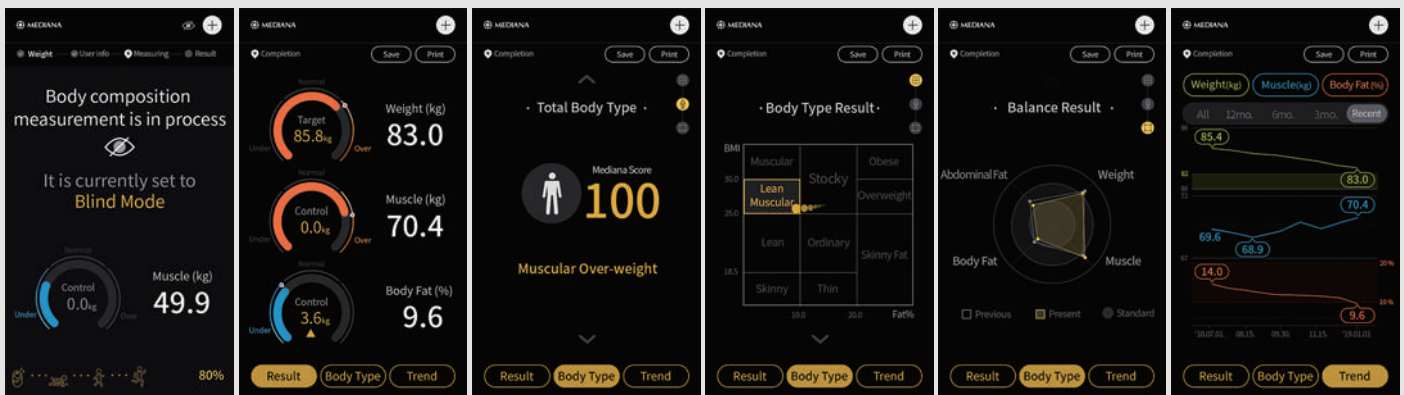

Personalized information management is possible using the dedicated PC software

### Age-specific Analysis

Provide adult and children analysis result sheet

### Compact Foldable Design

Lightweight and foldable design for easy storage.

## Professional Body Composition Analyzer

### Hardware Specification

**Measurement Frequency** : 5, 50, 100kHz

**Power** : Input - AC 100~240V, 50~60Hz, 1.5A / Output - DC 12V, 5A

**Input interface** : Keypad, Touch screen, Barcode reader (Optional)

**External interface** : RS232 (9pin serial cable) 1EA, USB host 2EA, Mini-USB B 1EA, Bluetooth (Optional), Wi-Fi (Optional)

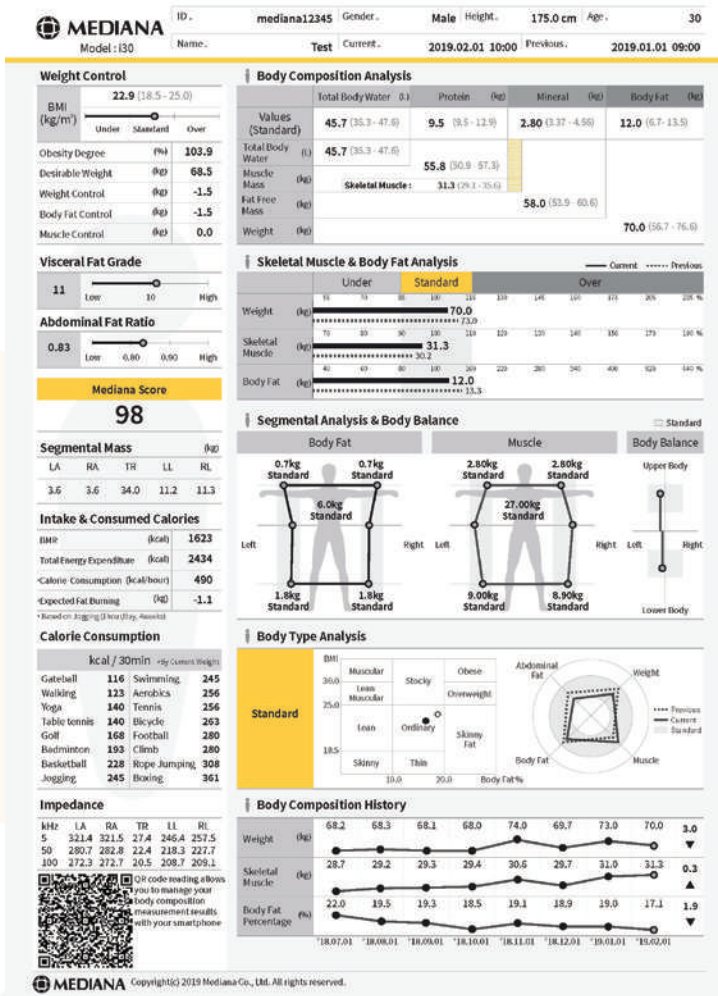

**Display** : 7 inch (600 x 1024), Color Touch LCD

**Dimension & Weight** : 360mm(W) x 559mm(D) x 1077mm(H), Appx. 17.5kg

**Measurement Time** : About 30 sec.

**Operating Environment** : Temp. 10°C~40°C, Humidity 30%~75%, Air pressure 70~101.3kh

**Storage Environment** : Temp. -10°C~60°C, Humidity 10%~80%, Air pressure 50~101.3kh

## Result Sheet General

Children Result Sheet is supported as an default option.

### Personal Information

ID, Gender, Height, Age, Measurement date and time (Previous/Current)

### Weight Control Guide

BMI, Obesity degree, Desirable Weight, Weight Control, Body Fat Control, Muscle Control

### Visceral Fat Analysis

Visceral Fat Grade, Abdominal Fat Ratio

### MEDIANA Score

Health score based on own algorithm

### QR-code

Manage your body composition measurement results with your smartphone

### Segmental Mass

Weight of each segment

### Intake & Consumed Calories

BMR, Total Energy Expenditure, Calorie Consumption, Expected Fat Burning, Personal Calorie Consumption per Exercise

### Impedance

Segmental Impedance Values

### Body Composition Analysis

Total Body Water, Protein, Mineral, Body Fat, Muscle Mass, Fat Free Mass, Weight

### Muscle & Body Fat Analysis

Weight, Muscle Mass, Body Fat Mass (Previous/Current)

### Segmental Analysis & Body Balance

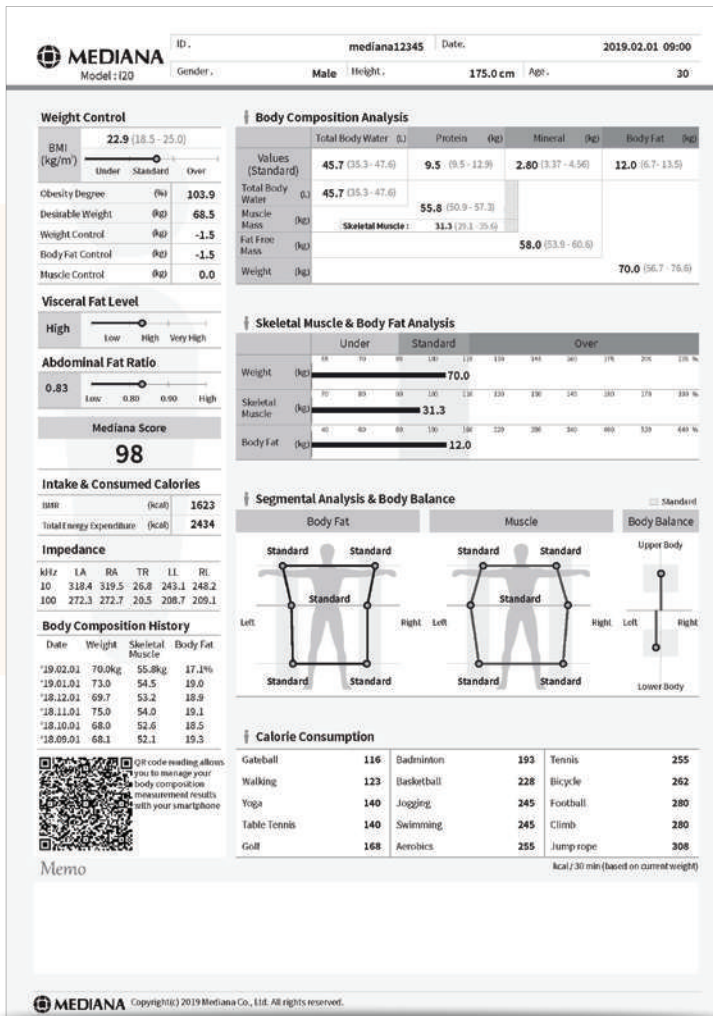

Segmental Muscle Assessment, Segmental Body Fat Assessment, Body Balance Assessment (Muscle Only)

### Body Type Analysis

Body Type Table, Body Type Graph

### Body Composition History

Previous measurement history up to 8 measurements

## Result Sheet General

### Personal Information

ID, Gender, Height, Age,  
Measurement date and time

### Weight Control Guide

BMI, Obesity degree,  
Desirable Weight, Weight Control,  
Body Fat Control, Muscle Control

### Impedance

Segmental Impedance Values

### QR-code

Manage your body composition  
measurement results with your  
smartphone

### Body Composition History

Previous measurement history up to  
6 measurements

### Body Composition Analysis

Total Body Water, Protein, Mineral,  
Body Fat, Muscle Mass, Fat Free Mass,  
Weight

### Intake & Consumed Calories

BMR, Total Energy Expenditure

### Muscle & Body Fat Analysis

Weight, Muscle Mass, Body Fat Mass  
(Previous/Current)

### Segmental Analysis & Body Balance

Segmental Muscle Assessment,  
Segmental Body Fat Assessment,  
Body Balance Assessment (Muscle Only)

### Visceral Fat Analysis

Visceral Fat Level, Abdominal Fat Ratio
